**Additional Information**

Thank you for purchasing this Technika HD Ready LCD/DVD TV which has been designed and manufactured to give you many years of trouble-free service.

You may already be familiar with using a similar product but please take time to read these instructions which have been written to ensure you get the very best from your purchase.

Throughout the remainder of this user guide the Technika HD Ready LCD/DVD TV will be referred to as the 'TV'.

## HDMI

HDMI (High Definition Multimedia Interface) is the next generation of digital interface. Unlike conventional connections, it transmits uncompressed digital and audio signals using a single cable. This TV supports high-definition video input (720p and 1080i) via the HDMI sockets on the back of the TV.

## Safety is Important

To ensure your safety and the safety of others, please read the Safety precautions *BEFORE* you operate this product.

Keep this information in a safe place for future reference.

## In the box

You will find the following:

- **HD Ready LCD/DVD TV**
- **User Guide**
- **Power Cable**
- **Remote Control**
- **2 x AAA Batteries**

*Note: If any of the items listed are damaged or missing, please contact the TESCO electrical help line on 0845 456 6767.*

**IMPORTANT SAFETY INSTRUCTIONS -
READ CAREFULLY BEFORE USE**

Take note of the following safety information which appears on the back of this TV.

**CAUTION! RISK OF ELECTRIC SHOCK
DO NOT OPEN.
TO REDUCE THE RISK OF ELECTRIC
SHOCK DO NOT REMOVE COVER (OR
BACK).
NO USER-REMOVABLE PARTS INSIDE
REFER SERVICING TO QUALIFIED
SERVICE PERSONNEL.**

This symbol indicates that there are important operating and maintenance instructions in the literature accompanying this TV.

This symbol indicates that dangerous voltage constituting a risk of electric shock is present within this TV.

## Keep these instructions.

• Do not use this TV near water.

• Clean only with a slightly damp cloth.

• Do not block any ventilation openings.

• Install in accordance with the supplied this User Guide.

• Do not install or operate near any heat sources such as radiators, stoves, or other apparatus that produce heat.

• Protect the power cord from being walked on or pinched, particularly at plugs, and the point where it exits from the TV.

• Do not allow the power cord to overhang the edge of a table.

• Unplug this TV during lightning storms or when unused for long periods of time.

• To avoid interference, switch this TV off while operating other radio devices in the immediate vicinity.

• Refer all servicing to qualified service personnel. Servicing is required when the TV has been damaged in any way, such as the power cord or plug being damaged, liquid being spilled on or objects have fallen onto the TV, the TV has been exposed to rain or moisture, does not operate normally, or has been dropped.

**WARNING! TO REDUCE THE RISK
OF FIRE OR ELECTRICAL SHOCK,
DO NOT EXPOSE THIS TV TO RAIN
OR MOISTURE. THE TV MUST NOT
BE EXPOSED TO DRIPPING AND
SPLASHING AND NO OBJECTS FILLED
WITH LIQUIDS SHOULD BE PLACED ON
THE TV.**

• No naked flame sources such as candles should be placed on the TV.

**Caution! Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate this device.**

**Caution! Usage of controls or adjustments or performance of procedures other than those specified herein may result in hazardous exposure.**

## Important

This TV generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with these instructions, may cause harmful interference to radio communication. However, this is no guarantee that interference will not occur in a particular installation. If the TV does cause harmful interference to electrical devices, which can be determined by turning the TV off and on,

the user is encouraged to try to correct the interference by one of the following measures:

• Re-orient or relocate the receiving antenna.

• Increase the separation between the external device and the TV.

• Connect the external device into an outlet on a circuit different from that to which the TV is connected.

• Consult the dealer or an experienced radio/ TV technician for help.

## Electrical Information

### Mains Supply

The mains operating voltage is detailed on the rating plate on the rear of the TV.

The mains lead on this equipment may be supplied with a moulded plug incorporating a fuse. Should the fuse need to be replaced, an ASTA or BSI approved BS1362 fuse must be used of the same rating. If the fuse cover is detachable never use the plug with the cover removed. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug. If there is no alternative to cutting off the mains plug, dispose of it immediately, having first removed the fuse, to avoid a possible shock hazard by inadvertent connection to the mains supply.

## FRONT PANEL

10. TV signal input (75 Ohm)
11. USB connector
12. AC Power supply

⚠️ **WARNING! ENSURE THE TV AND ALL ANCILLARY EQUIPMENT IS UNPLUGGED FROM THE MAINS BEFORE MAKING ANY CONNECTIONS!**

# Connecting the TV antenna

Connect the TV antenna to the aerial socket with a 75 ohm co-axial plug. For best results use a high gain TV aerial, preferably roof or loft mounted.

- To improve picture quality in a poor signal area, purchase and install a signal amplifier.

- If the antenna needs to be split for two TV's, use a 2-Way Signal Splitter (not supplied).

# Connecting external devices

ⓘ Note: The TV will connect through the HDMI cable by default. Only use the HDMI cable and one other option. Connecting more than one option may cause interference.

## HDMI lead

You can connect this TV to a compatible device using a HDMI lead. This method will give the best picture.

Connect the cable from the HDMI equipment to the TV HDMI socket.

## SCART lead

You can connect this TV to a compatible device using a SCART lead. The connection uses component video signals, i.e. the red, green and blue (RGB) content of the video are sent on separate signals.

## VGA cable

You can use your TV as a monitor for your personal computer by using a VGA cable. Sound from your personal computer may also be played through the TV. This requires the audio output of the personal computer to be connected to the AUDIO IN connection of the TV.

## Component Input (Y/Pb/Pr cables)

You can connect this TV to a compatible device using Y/Pb/Pr cables. Connect the red, green and blue outputs to the matching coloured inputs on the compatible device. An additional audio input is required.

## USB connector

This product has a USB 2.0 interface; you can play music, movie and picture files from USB equipment. USB refers to Universal Serial Bus. Most of the USB devices on the market are USB 1.1 or USB 2.0. There are some types USB 1.1 devices:
Monitors Communication devices, Audio, Human Input Device (HID), Mass storage, Most flash memory, USB HDD etc. Belongs to Mass Storage Class.
Mass Storage Class includes 2 transport manners:
1. USB 1.1 Mass Storage Class Control/Bulk/Interrupt (CBI) Transport
2. USB 1.1 Mass Storage Class Bulk-Only Transport. This unit supports USB 1.1 Mass Storage Class Bulk-Only Transport, we are not sure that other USB devices can be supported! So please find out about the features of USB equipments before using it.

**CONNECTING DIAGRAM**

## NOTE

You should insert all necessary cables BEFORE plugging in power cord.

## COMMON INTERFACE

The Common Interface (CI) slot is designed to accept the Conditional Access Module (CAM) and Smart Card in order to view the pay TV programmes and additional services. Contact your Common Interface service provider to get more information about the modules and subscription.

*i*    Note: Conditional Access Modules and Smart Cards are sold separately.

⚠    **WARNING: SWITCH OFF YOUR TV BEFORE ANY MODULE IS INSERTED IN THE COMMON INTERFACE SLOT.**

The CI slot is located on the side of your TV. Insert the CAM correctly into the CI slot, then add the Smart Card to the CAM.
## WALL MOUNTING

Suitable for wall mounting - VESA 200 x 200 mm

1. The base must  first be removed. Place the TV face down.

2. Remove the three screws holding the base in position.

3. Remove and store the base and screws.

4. Use four machine screws (M4  x  10 mm) to mount the TV on the bracket.

Mounting the wall bracket - please refer to the user instructions supplied with the wall bracket (not supplied).

## BATTERY INSTALLATION

Remove the battery cover. Insert two SUM-4(AAA) batteries matching the -/+ polarities of the battery to the -/+ marks inside the battery compartment, as follows:
## BATTERY LIFE

● Normally, battery can be used for one year.

● If the remote control is still not working, when very near to the TV's remote sensor window, please use new batterys.

● Please use SUM-4(AAA) battery.

## ⓘ NOTES

● Never use rechargeable battery.

● Never charge, short-circuit, disassemble and heat the battery, or throw it into fire.

● Pay attention not to fall or knock the remote controller, which will cause damage or function failure to it.

● Do not use a new and an old battery together.

● When not using the remote controller for a long time, please take out the battery to avoid liquid leakage. Before replacing a new battery, please clean the electrolyte in the remote controller.

● If electrolyte splashes into the body, please clean it with water.

CAUTION：
Please put the battery into a place children cannot touch. If swallow by accident, please contact your local doctor immediately.

## SWITCHING ON

After the unit has been suitably placed / fixed, on the table or on the wall, and all necessary cables including the power have been connected, the next you should do is:
Press the  [STANDBY] button on the remote control to make the unit switch to power-on mode - you will see the LED indicator turn green. Now you can enjoy the many features of your new TV.

- The picture will be displayed incorrectly while adjusting.

## FUNCTION

Select FUNCTION item to adjust function parameters. You may select Language, Sleep Timer, Aspect Ratio, Blue Screen and Restore Setting.

- Language item enables you to select the OSD language.
- Sleep Timer item enables you to set the sleep timer (Off, 10 min, 20 min, 30 min, 60 min, 90 min, 120 min, 180 min and 240 min).
- Aspect Ratio item can be changed between 16:9 and 4:3.
- Blue Screen item can be changed between On and Off.
- Restore Setting item enables you to reset all values to default.

## BRIEF INTRODUCTION

This product has a USB 2.0 interface; you can play music, movie and picture files from USB equipment.

USB refers to Universal Serial Bus. Most of USB devices on the market are USB1.1 or USB2.0. There are some types USB 1.1 devices: Monitors Communication devices, Audio, Human Input Device (HID), Mass storage, Most flash memory, USB HDD ect. Belongs to Mass Storage Class. Mass Storage Class includes 2 transport manners:

1. USB 1.1 Mass Storage Class Control/Bulk/Interrupt (CBI) Transport

2. USB 1.1 Mass Storage Class Bulk-Only Transport .This unit supports USB 1.1 Mass Storage Class Bulk-Only Transport, we are not sure that other USB devices can be supported! So please find out about the features of USB equipments before using it.

## PLAYBACK

Press **[SOURCE]** button to select USB source and insert USB equipment, the USB operation menu appears on screen as below.

1: State window              Display the current playing mode.
2: DIR window                Display the path.
3: File window                Display the current path's file.
4: Preview window        Movie playing or image preview window.
5: Information window     Display the current file's information.

Press $[\blacktriangleleft/\blacktriangleright]$ to select playing mode and press **[OK]** button to enter.

Thus current playing mode is highlighted.

| Item | description |
|------|-------------|
| | Music mode |
| | Movie mode |
| | Photo mode |

**Notes:**

1. This product supports MP3, MPEG1, MPEG2, AVI, JPEG and BMP format files.

2. The file system supports FAT16, FAT32 and NTFS.

3. MTP (Media Transfer Protocol) is not supported.

4. Please connect directly to the USB port of your TV. If you are using a separate cable connection, there may be a USB compatibility problem.

5. Before connecting your device to the TV, please back up your files to prevent them from damage or loss of data. The manufacturer is not responsible for any data file damage or data loss.

6. Do not disconnect the USB device while it is loading.

7. If you want to change playing mode, firstly you have to exit current playing mode through pressing **[EXIT]** button.

8. The higher the resolution of the image, the longer it takes to display on the screen.

9. For unsupported or corrupted files, the 'Unsuported format' message is displayed.

## PLAY MUSIC

1. Press  [◄/►] button to select " 🎵 "item and press **[OK]** button to enter.

2. Press  [▲/▼]  button to select the directory you desire and press **[OK]**

button to confirm. Select " 🔙 " item and press **[OK]** button to return previous

path.

3. Press  [▲/▼]  button to select the file you desire and press **[OK]** button to confirm.

4. Press **[ ❚❚/► ]** button to pause playing and press    [ ► ]    button to resume.

5. Press  [ ■ ]  to stop playing.

6. You can set the repeat mode. Press **[REPEAT]** button to set the mode: off, repeat one or repeat all.

Press **[EXIT]** button to exit music mode.

## PLAY MOVIE

1. Press  [◄/►] button to select " 🎬 "item and press **[OK]** button to enter.

2. Press  [▲/▼]  button to select the directory you desire and press **[OK]**

button to confirm. Select " 🔙 " item and press **[OK]** button to return previous

path.

3. Press  [▲/▼]   button to select the file you desire and press **[OK]** button to confirm.

4. Press  [ ► ]  button to play full screen, and exit full screen by pressing

[ ■ ] or **[exit]** button.

## OPERATE IN FULL SCREEN STATE

1. Press **[SETUP]** button to enter into the main menu. The menu setup is the

same as AV mode. You can find it in preceding pages.

2. Press **[ ‖/► ]** button to pause playing/steps playback in pause mode and

press 〔 ► 〕 button to continue  playback.

3. Press 〔 ►► 〕 button and the unit begins fast forward playback.

Press 〔 ►► 〕 button each time and the program playback speed switches in the
following sequence circularly:

**Play -> 2x fast forward ->play**

## PLAY PHOTO

1. Press **[◄/►]** button to select " ▐◎▌ " item and press **[OK]** button to enter.

2. Press 〔 ▲/▼ 〕 button to select the directory you desire and press **[OK]**

button to confirm. Select " ⤵ " item and press **[OK]** button to return previous
path.

3. Press 〔 ▲/▼ 〕 button to select the file you desire and press **[OK]** button to
confirm.

4. Press  〔 ► 〕  button to play full screen, and quit full screen by pressing  〔 ■ 〕
or **[EXIT]** button.

5. Press  〔 ◄◄ 〕〔 ►► 〕 button in full screen mode to turn to the last or next page.

## BRIEF INTRODUCTION

DVD provides brand-new AV effect for consumers with its extraordinarily large capacity and outstanding audio-video effects. Its capacity is as high as 4.7-17 GB (approximately 7-26 times the CD capacity) and horizontal resolution of picture is above 500-line.

## Comparison between DVD and other Discs

| | DVD | | | | LD | SVCD | VCD | CD | CDROM |

## Function Introduction

● Multiple languages and subtitles
  DVD disc can support as many as 8 dubbing languages and 32 subtitle languages.

● Multiple story plots
  User can select to play the desired plots (the beginning, development or ending) of the same disc.

● Multiple aspect ratios
  Multiple aspect ratios support various TV screens.

| Disc Pictures | TV Screen | | |
|---|---|---|---|
| | 4:3 | | 16:9 |
| | Pan-Scan | Letterbox | |
| 4:3 | | | |
| 16:9 | | | |

## FEATURES

This player employs the new generation MTK decode chip with more convenient system and more stable operation.  Super error correction slot-in loader with twin laser with good shockproof performance.

### ■ Brand-new AV Effects

❶ Compatible with MPEG 4 format discs to produce wonderful pictures.

❷ 108MHz/12bit video DAC with more vivid and brilliant pictures.

❸ Progressive-scan video outputs to eliminate the flickers not rectified by interlacing scan and therefore your eyesight will be well-protected. At the same time, the pictures definition is sharply enhanced and the pictures will be finer, smoother and more stable.

### ■ Convenient Functions

❶ Direct entry into desired scenes (title/chapter/time/track search).

❷ Multi-level zoom in/out playback function to provide you with brand-new enjoyment method.

❸ Multiple aspect ratios to fit TV sets of various screen ratios.

❹ Parental lock function to prevent children from watching unsuitable discs.

❺ Multiple dubbing languages and subtitle languages bring you the best entertainment status all the time.

### ■ Super compatible with VCD, SVCD, CD, HDCD, KODAK PICTURE CD etc.

**NOTE:** * Some discs labelled with MPEG4 on the market actually are *.rm/*.ra/*.ram/*.rmm and others which are not compatible. Please take care when buying discs.

## COMPATIBLE DISC TYPES

| Types | Sizes | Recorded Contents |
|-------|-------|-------------------|
| **DVD** VIDEO | 12cm | DVD: Compressed digital audio + compressed digital video (dynamic picture) |
| **SVCD** | 12cm | SVCD: Compressed digital audio + compressed digital video (dynamic picture) |
| **MPEG4** | 12cm | MPEG4: Compressed digital audio + compressed digital video (dynamic picture) |
| **disc** COMPACT DIGITAL VIDEO | 12cm | VIDEO CD: Compressed digital audio + compressed digital video (dynamic picture) |
| **disc** COMPACT DIGITAL AUDIO | 12cm | CD-DA: Digital audio |

### (i) NOTES

- Issues related to   DVD   MPEG4   SVCD   VCD   CD

   These icons on the top banner indicate the disc types that the function described in the section applies to.

   DVD   Applies to DVD disc                 VCD   Applies to VCD disc

   MPEG4   Applies to MPEG4 disc           CD   Applies to CD disc

   SVCD   Applies to SVCD disc

- This model does not support the 8cm disc. Do not insert that type of disc into this device to prevent a disc jam.

- This model supports DIVX playback, but with data rate of up to 10Mbps.

### Region code

If the region code of the disc being played does not match the region code of this DVD player then the disc cannot be played. If you do try to do this a region violation notice will appear on the screen.

The region code for this player is region 2 (refer to the symbols below).

ALL   2   1 2   1 2 3 4

## PLAYBACK

DVD  MPEG4  SVCD  VCD  CD

**1. Power on and switch signal source to DVD mode and the unit begins to work.**

**2. Place the disc (with label side facing user) to the door and the unit will draw in the disc automatically.**

● The unit begins to read disc information.

RC-D3-03

EJECT ———————— ———————— STANDBY

▸▸ 2X ▸▸ 4X ▸▸ 8X
▶ ◂ ▸▸16X ◂

**2. Press [ ◂◂ ] button and the unit begins fast backward playback.**

- Press [ ◂◂ ] button each time and the disc playback speed switches in the following sequence circularly:

◂◂2X ◂◂4X ◂◂8X
▶ ◂ ◂◂16X ◂

## PLAY FROM THE DESIRED POSITION

DVD  MPEG4  SVCD  VCD  CD

■ Play DVD disc

- Inputting a certain time, title number or chapter number directly may search the disc quickly and then play forward from this position.

**1. Search title and chapter. For instance, search the 2nd chapter in title 6.**

- Press [GOTO] button and TV screen displays:

Title 03/30   Chapter        /02

- Press [◂/▸] button to move cursor and lighten the title number, shown in the figure:

Title    /30   Chapter      01/02

- Then press number button 6 to select Title 6, shown in the figure:

Title   06 /30   Chapter      /02

- Finally press number button 2 to select Chapter 2, shown in the figure:

Title   06 /30   Chapter      02/02

**2. Search title time**

- Press [GOTO] button until TV screen displays the following figure. Then press number buttons to input hour, minute and second.

Title   06/30   Time    : :

**3. Search chapter time**

- Press [GOTO] button until TV screen displays the following figure. Then press number buttons to input hour, minute and second.

Chapter    01/04   Time    : :

■ Play MPEG4 disc

**1. Select track**

● Press [GOTO] button until TV screen displays the following figure. Then press number buttons to input the track.
> Select

**2. Search track time**

● Press [GOTO] button until TV screen displays the following figure. Then press number buttons to input hour, minute and second.

> Go To    --:--:--

■ Play SVCD, VCD and CD discs

**1. Search disc time**

● Press [GOTO] button until TV screen displays the following figure. Then press number buttons to input minute and second.
> Disc Go To    --:--

**2. Search track time**

● Press [GOTO] button until TV screen displays the following figure. Then press number buttons to input minute and second.

> Track Go To    --:--

**3. Select the track**

● Press [GOTO] button until TV screen displays the following figure. Press number buttons to input track.

> Select Track    -- /15
GOTO

## ZOOMING THE DISPLAYED FRAME

DVD    MPEG4    SVCD    VCD

● Zoom in/out the player frame.

1. When playing a disc, press the [ZOOM+/-] button can open the zoom in/out function, and the TV screen displays( take X2 mode as an example):

> 2X

● The frame is magnified to 2 times of the normal size.

2. Press the [ ZOOM + ] button continually, all the magnified/ minified modes display on the screen in turn. The magnified/ minified modes includes:2X,3X,4X.

3. Press the [ ZOOM - ] button continually, all the magnified/ minified modes display on the screen in turn. The magnified/ minified modes includes:1/2,1/3,1/4.

4. When the mode is on 4X, press [ ZOOM + ] button to close the zoom in/ out function, and the frame restores normal size. When the mode is on 1/4,press [ ZOOM -] button.

5. When the picture is magnified, press the [ ▲/▼ ◄/► ] buttons to move the frame.

ZOOM

## MPEG4 AND JPEG FILE PLAYBACK

MPEG4 is the audio standard published by MPEG(Moving Pictures Experts Group) in November,1998. As the discrepant parts between frames of picture are only processed and the same parts are deleted, the data number are greatly decreased. The most distinct feature of MPEG4 is the high compression and clear imaging. Furthermore, MPEG4 provides elastic specifications to adjust the stream according to the used requirements. The larger stream can be used when collecting private films; and the small stream can be used in network transferring, which make MPEG4 use widely.

JPEG(Joint Photographic Experts Group) is the most widely used picture compression and storage format today. Utilizing high efficiency compression algorithm, JPEG compresses the original picture 15 to 20 times with excellent picture quality. JPEG is featuring small size data, convenient application and supported by most picture processing software, so it is very fit to store photos.

The strong decoding capability of this unit can decode and play the files with the above formats. In the course of playing, an operation menu will appear and its construction is shown as follows.
❶ State window
　　Display the current
　　state information.

❷ DIR window
　　Display the current
　　path.

❸ File window
　　Display the current
　　path's file.

❹ Scroll bar window
　　Indicate the current file's
　　position.

❺ Preview window
　　JPEG image preview.

❻ Information window
　　Display the current operation
　　prompts.

The state information in state window is as follows:
❶　Elapsed playback time

❷　Total playback time

❸　The audio bit rate  (generally the bit rate is 128kbps,
　　sometimes it is VBR.)

❹　Current playback mode indicator

❺　Track indicator

❻　Dynamic frequency spectrum indicator

## 1. Play MPEG4 file

After you put an MPEG4 format file into the unit, it will search disc information and display the operation menu as figure A (The displayed content varies with disc.).

A:
```
00:00 00:00
001/004          ■
📁 \
  📁 Du000
  📁 Du001
  📁 Du002
  📁 Du003
```

B:
```
00:00 00:00
001/369          ■
📁 \Du000\
  📁 ..
  MP000
  MP001
  MP002
```

● Press [▲/▼] button to select the directory you desired and press [OK] button to confirm. For instance, you select the directory Du000 in Figure A, press [OK] button and TV screen displays as in Figure B. The window returns to the previous directory when you select [📁....] or press [◄] button.

● In Figure B, press [▲/▼] button to select the MPEG4 format file you desired and press [OK] button to confirm. The unit begins to play MPEG4 format movie.

## 2. Play JPEG file

After you put an JPEG format file into the unit, it will search disc information and display the operation menu as in the following figure. After selecting JPEG file, the preview window will appear this file's preview image to facilitate you to select. After you select the JPEG file you desired and press [OK] button to confirm, the picture will display in full screen.

```
00:00 00:00
004/369
📁 \PIC\
  📁 ..
  Du000
  Du001
  Du002
RESOLUTION  640×480
```
■ Other basic operation methods
1. Press [ ◄◄ ],[ ►► ] button may turn to the next or last page.

■ Other functions of JPEG file
1. When playing JPEG file, press [ZOOM] button to enter zoom in/out, and press it again to stop this function.
2. When in zoom in/out, pressing [ ►► ] button may magnify the picture and it can magnify the frame twice at most as the original one. Pressing [ ◄◄ ] button may minify the picture and it can minify the frame half at most as the  original one.

3. When playing JPEG file, pressing [ ■ ] button may realize preview playback function.
   At the same time, all JPEG files are displayed on the TV screen. One frame can display up to 12 pictures at most. The other ones are shown on the next frame. Pressing [ ▶▶ ] button may enter the next frame and [ ◀◀ ] button may enter the previous frame. You may press number buttons or [ ▲/▼ ] button to select the picture you desired and press [OK] button to confirm.

4. When in preview playback, pressing [DVD-MENU] button may exit preview playback function.

ℹ️ **NOTE**

When buttons are invalid, TV screen displays:

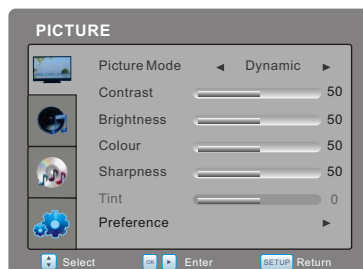

● Please press effective button again.

## PICTURE

Select PICTURE item to adjust picture parameters. You may adjust Picture Mode, Contrast, Brightness, Colour, Sharpness, Tint and Preference.

■ Picture mode item can be changed between User, Standard, Soft, Dynamic.

You may adjust Brightness, Contrast, Colour, Sharpness, Tint for User mode.

■ Preference item enables you to enter sub menu.
   Colour Temp. item can select colour temperature mode: Normal, Warm, Cool and User.

■ Noise Reduction item can select reduce noise mode: Off, Low, Middle, High.

| PICTURE | | |
|---|---|---|
| Picture Mode | ◄ Dynamic ► | |
| Contrast | | 50 |
| Brightness | | 50 |
| Colour | | 50 |
| Sharpness | | 50 |
| Tint | | 0 |
| Preference | ► | |
| ⭥ Select | OK ► Enter | SETUP Return |

## SOUND

Select SOUND item to adjust sound parameters. You may select Sound Mode, Treble, Bass, Balance, Auto Volume and Surround Sound.

■ Sound Mode item can be changed between Music, Film, News, User.

■ Auto Volume item enables you to adjust Off or On for control volume automatic.

■ Surround Sound item enables you to select Off or On for surround sound.

| SOUND | | |
|---|---|---|
| Sound Mode | ◄ User ► | |
| Treble | | 50 |
| Bass | | 50 |
| Balance | | 0 |
| Auto Volume | ◄ Off ► | |
| Surround Sound | ◄ Off ► | |
| ⭥ Select | OK ► Enter | SETUP Return |

## DVD SETTING

Press [SETUP] button , and the main menu will show as follows:

By pressing [▲/▼] button on the remote control, you can select the following items, "General", "Preference", press [ ► ] or [OK] button to confirm.

| DVD SETTING | |
|---|---|
| General | ► |
| Preference | ► |
| ⭥ Select | OK ► Enter SETUP Return |
■ **GENERAL SETUP**

You may select TV DISPLAY, SCREEN SAVE and DOWNMIX and Divx.

TV display: this item is used to set the output picture ratio of this unit.
- Optional settings: Normal/Pan-Scan, Normal/Letterbox, Wide Screen; Default: Normal/Letterbox

Screen Save: Open or close the screen saver
- Optional settings: Off, On; Default: On
Downmix: this item is used to set this unit's DOWNMIX mode to change multi-channel audio into 2-channel audio output.
- Optional settings: Stereo, LT/RT;  Default: Stereo

Divx: this item is used to set the codepage )character encoding table) for MPEG-4 format subtitles.
1252 - West European Latin (used by Western Eurpean languages)
1250 - East European Latin (used by Central & Eastern European languages)
1251 - Cyrillic (used by Belarusian, Bulgarian, Macedonian, Russian, Serbian and Ukrainian languages)

| TV Display | LB |
| Screen Save | On |
| Downmix | Stereo |
| Divx | 1252 |

Set TV Display Mode

■ **PREFERENCE SETUP**

TV Type: To set the output video system of this player.
- Optional settings: Auto, PAL, NTSC; Default: PAL

PBC: this item is used to set PBC state.
- When playing SVCD, VCD2.0 discs, if PBC is set On, this unit enters PBC playback mode; if PBC is set Off, the unit plays the disc according to track sequence.
- Optional settings: On, Off; Default: On
Audio: this item is used to set the preference audio language when playing.

Subtitle: this item is used to set the preference subtitle language when playing.
Disc menu language: this item is used to set the preference disc menu language when playing.

- Default of disc menu language: English
- Default of subtitle: English

*[Screen shows:]*
– – Preference Page – –

| TV Type | PAL |
| PBC | On |
| Audio | ENG |
| Subtitle | ENG |
| Disc Menu | ENG |
| Parental | Off |
| Password | |
| Default | |

Set TV Standard

**i** NOTE
- Audio, subtitle and disc menu language are only effective to DVD disc.
- If the disc is not recorded with the language you appointed, the unit will apply the language that the disc appointed to play.

- Select other languages: press [▲/▼] button to move cursor to "OTHER" item, press [OK] button and then number buttons to input the language code you desire. After input finishes, press [OK] button again.

Parental: this item is used to set the parental control ratings to prevent children from watching the restricted contents. (In case the disc supports this function)

- Optional settings: KID SAFE, G, PG, PG 13, PGR, R, NC17, ADULT, Off; Default: Off

**i** NOTE
- When changing the parental control ratings, a password is needed. Please refer to the following password item for details.

Password: this item is used to set a four digital password to enable you to change the parental control ratings.

- Default: 7890

Default: this item is used to restore all settings to the default value except "Parental control" and "Password" in the setup menu.

| Old password | |
|---|---|
| New password | |
| Confirm PWD | |
| | OK |

## FUNCTION

Select FUNCTION item to adjust function parameters. You may select Language, Sleep Timer, Aspect Ratio, Blue Screen and Restore Setting.

- Language item enables you to select the OSD language.

- Sleep Timer item enables you to set the sleep timer (Off,10min,20min,30min,60min,120min,180min and 240min).

**FUNCTION**

| | | |
|---|---|---|
| Language | ◄ English ► | |
| Sleep Timer | ◄ Off ► | |
| Aspect Ratio | ◄ 16:9 ► | |
| Blue Screen | ◄ Off ► | |
| Region | ◄ Other ► | |
| Restore Setting | ► | |

Select   OK ► Enter   SETUP Return

- Aspect Ratio item can be changed between: Auto,16:9 and 4:3 (Auto is invalid for VGA)
- Blue Screen item can be changed between On and Off.
- Restore Setting item enables you to reset all values to default.
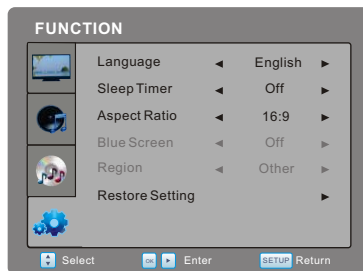

Please check for causes of problems in accordance with the following chart before contacting any maintenance personnel.

## DISPLAY TROUBLESHOOTING

| Symptom | Causes and Correction |
|---|---|
| Black screen, power indicator light off | ◆ Check whether power cord is correctly connected, and whether this unit is in power on. |
| | ◆ Check whether the signal cord of input device is correctly connected.<br>◆ Check whether input device is in power on mode. |
| Image display flicker, unstable | ◆ Check whether the input device signal is in this unit's specification |
| | ◆ Check computer output mode: control panel-display-setup<br>◆ If the setup does not accord with this unit's specification, please change the display setup |
| | ◆ Hor scanning frequency: 30kHz~75kHz<br>◆ Ver scanning frequency: 50 Hz~75Hz |

## SOUND AND TV TROUBLESHOOTING

| Symptom | Causes and Correction |
|---|---|
| Cannot power on | ◆ Please make sure the power cord is connected correctly. |
| No sound | ◆ Please make sure the audio cord is connected correctly. |
| | ◆ Check volume. |
| | ◆ Make sure there is nothing plugged into the headphone jack. |
| Volume too low | ◆ Check volume. |
| | ◆ If volume is still too low when adjusting volume to maximum, please check whether the input device is correctly set. |
| Snowy picture | ◆ Input antenna damaged or not correctly connected. |
| Remote control failure | ◆ Check whether remote control batteries are functioning.<br>◆ Check the battery installation is correct.<br>◆ Check whether an obstacle is between the remote control and the unit's receiving window.<br>◆ Check whether the receiving window has a strong light. |

## DVD TROUBLESHOOTING

| Symptom | Causes | Correction |
|---------|--------|------------|
| Not play | 1. Condensation on laser head<br>2. Disc not properly loaded<br>3. Disc not compatible with the unit | 1. Switch on power and wait for 1 to 2 hours<br>2. Make sure label side of the disc is facing up<br>3. Confirm whether this unit compatible with the inserted disc |
| Sound distortion | 1. Too large volume of connected device<br>2. Sound field mode not suitable for disc | 1. Adjust the device volume<br>2. Adjust appropriate sound field |
| No sound | 1. Disc warped or dirty<br>2. The unit in mute state | 1. Clean the disc<br>2. Press MUTE button to cancel it. |
| No image | 1. TV not set for proper system | 1. Reset AV/TV state of TV |
| No colour | 1. TV system not right<br>2. TV colour not well adjusted | 1. Try to change the colour system<br>2. Reset the TV colour |
| No disc reading | 1. Disc warped or dirty<br>2. Disc not correctly placed<br>3. Condensation on laser head | 1. Clean the disc<br>2. Reload a disc with label side facing up<br>3. Switch on power, unload disc and leave it for about 1 hour |
| Temporary function failure | 1. Mal-fabricated disc used<br>2. Wrong buttons pressed<br>3. Static leakage into the unit from outside | 1. Wait for 5 to 10 seconds to restore to normality automatically<br>2. Operate again<br>3. Power off for 1 to 2 minutes to power on again |
| No subtitle | 1. No subtitle made in disc<br>2. The unit subtitle is turned off | 1. Disc problem<br>2. Press Subtitle button to select it |
| Image rolling | 1. System setup not suitable for disc | 1. Adjust system mode |

- If the above methods still cannot solve the problems or the troubles are special, please contact the local maintenance personnel.

**NOTES**

● This product does not support the display mode not listed above. In order to achieve the best display effect, please select the above-listed 20 display modes input signal.

● Because of the difference of display card output signal (especially non-standard signal output), the display image may appear with a little disturbance which can be adjusted through " AUTO CONFIG " in the "PICTURE" menu by users.

● To prolong this unit's service life, you are suggested to use power management function of computer.

## Care and Maintenance

### Handling Discs

- To remove a disc from its storage case, press down on the centre of the case and lift the disc out.

- Discs should be returned to their cases after use. This avoids serious scratches that could cause the laser pickup to skip.

- Hold the disc by the edges, to avoid touching the recorded side of the disc.

- Fingerprints and dust should be carefully wiped from the disc's surface with a soft cloth.

- Never use chemicals such as record sprays, antistatic sprays, benzene, or thinners to clean the discs. These chemicals can irreparably damage the disc's surface.

- Audio discs and DVD discs have no grooves to collect dust and microscopic debris so gently wiping with a soft cloth should remove most particles.

- Wipe in a straight line from the inside to the outside of the disc. Small dust particles and light stains should have no effect on reproduction quality.

- Do not expose discs to direct sunlight, high humidity, or high temperatures for extended periods. Exposure to high temperatures can warp the disc.

- Do not stick paper or write anything with a ball point pen on the label side of the disc.

## Disposal

*UK: Waste electrical products should not be disposed of with household waste. Separate disposal facilities exist, for your nearest facilities see* **www.recycle-more.co.uk** *or in-store for details.*

*ROI: Produced after 13th August 2005 Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.*

## Warranty

Your TESCO appliance is covered by a warranty for 12 months from the date of purchase. If a fault develops during this period, please contact the TESCO electrical help line on 0845 456 6767. Please have your original purchase receipt with you when you call. This warranty in no way affects your consumer rights.
